

6. How are the environmental problems at Owens Lake being addressed?

7. The following is an aerial photo of the SE Wyoming. What are the circular patterns in the landscape? What relationship do these patterns have to water use?

8. Give 2 examples of how pollution lowers the level of DO in fresh water.

9. Why are lakes more vulnerable to the effects of pollutants than streams or rivers?

10. What is the main cause of enrichment (eutrophication) of lakes?

Bonus: Mercury is not expected to accumulate in organisms since it is inorganic and not lipophilic. Explain how mercury bioaccumulates in food chains.
